

Quality Windows And Doors.
Great Service. Exceptional Value.

Grilles
The beauty of your North-Air windows can be enhanced through traditional or contemporary grilles, available in three profiles: flat, georgian (contour) and pencil.

Grille Configurations:

CUSTOM GRILLE PATTERNS ARE ALSO AVAILABLE

Grille Types
Between The Glass (BTG) – Our BTG grilles are encased between the two panes of insulating glass, leaving a smooth surface that's a breeze to clean.

Simulated Mullion – Our simulated mullion is used to give the appearance of a transom (as shown, far left), or to create the look of a slider window in a casement unit.

All grilles are available in colors to match our window and door exteriors, as well as pewter and brass. For details on the color and profile combinations available, visit our website, www.northairwindow.com.

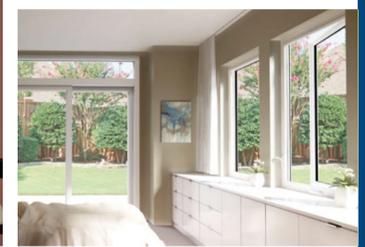

Colors
In addition to standard white, North-Air AAMA-certified extrusions also come in seven exterior colors – cream, hickory, chestnut brown, cocoa, sable, sandalwood and espresso. These UV-resistant acrylic overlays, with an embossed wood grain texture, will remain attractive for years to come.

And you can enjoy the warmth of an oak interior finish with our Natural and Canadian Oak interior finishes. Made from a durable PVC laminate with an acrylic overlay, they're virtually indistinguishable from real wood.

Due to variations in the printing process, the colors shown may not be exact. Ask your North-Air dealer to show you an actual color sample. E.&O.E. Specifications are subject to change without notice.

Why We are the Best
North-Air has earned a reputation for manufacturing and distributing attractive, high-quality, energy efficient vinyl windows and doors.
North-Air's manufacturing system ensures all our vinyl windows and doors are built to meet or exceed industry standards. Our products are tested and meet all Canadian Standards Association standards. We're so confident in our windows and doors that we back them with a transferable, limited lifetime warranty.
When you buy North-Air products, you know you're getting the best quality and value for your investment.

Manufactured to the Highest Standards
The strong relationship we have with our various manufacturing partners has helped us maintain our reputation for leadership, innovation and the production of windows and doors of impeccable quality.

As A Matter Of Fact,
Our Windows And
Doors Are The Best.

NORTHAIRWINDOW.COM

Kids Can't Fly Screens are not designed to restrain a child from falling through an open window. Please take proper precautions.

Since 2001 North-Air has been an industry leader in the manufacture of attractive and energy-efficient vinyl windows and patio doors. Whether you're building a new home or upgrading to today's standards, North-Air has an extensive range of quality, energy-efficient and full-featured windows that are not only beautiful, but offer exceptional value.

When you purchase North-Air windows and doors, you get a high-quality and low-maintenance product with a limited lifetime warranty. Made of durable vinyl, they never need to be painted. And because they exceed industry standards for energy efficiency, they are proven to reduce your energy costs while they increase the value of your home.

Standard Features For All Of Our Energy-Efficient Quality Windows

- 1. Super Spacer** – Super Spacer S Class construction between glass panes resists condensation, reduces noise and boosts insulation values by up to 30%.
- 2. Low-E / Argon Gas** Thermopanes with Low-E and Argon Gas, are a high performance, energy-efficient glass that is designed for top performance in our northern climate, which is why it can rate highest on the Canadian Energy Rating. Made with a Low-E coating, these thermopanes allow the sun's energy to warm your home in the winter.
- 3. Fusion Welded** – The corners on all North-Air frames and sashes are fusion welded for added strength and a perfect seal.
- 4. Energy Efficient Extrusions** – North-Air's vinyl extrusions save energy – and money – and resist warping, cracking and peeling.

Slider, Single- & Double-Hung Features

- Screen Pulls** – Durable pull tabs take the struggle out of removing window screens. These tabs are available in colors that match North-Air's windows.
- Recessed Finger Latch** – A simple, concealed latching system that is easy to operate, yet offers superior security.

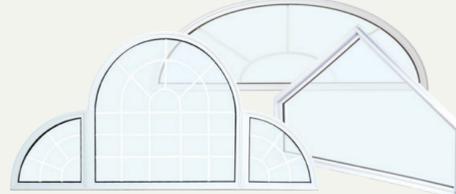

Casement, Awning & Picture Features

- Contoured Glazing Stop** – Interior contoured glazing stop with miter-cut corners for clean lines that complement any room.
- Exterior Bevelled Frames** – Attractive exterior frames feature a traditional looking bevelled profile.

EZ-Screen
North-Air's innovative EZ-Screen comes standard in all Casement and Awning windows. Featuring a completely hidden retention system, EZ-Screen has smooth edges that won't snag on draperies and is incredibly easy to use – just push-down and pull-out!

Awning Windows

Awning windows provide optimal airflow, while protecting your home from the elements, and are a great option for any room in your house. North-Air's awning windows come standard with multi-point locks and fold-down handles.

Casement Windows

Casement windows offer contemporary styling and convenience. They open and close easily with the simple turn of a handle, and provide clean sightlines with an unobstructed view. Durable multi-point locking hardware, and fold-down handles comes standard.

Picture Windows

Available in extrusions that match all of our operating windows, the picture window's simplicity makes it the most versatile of our line. They can be combined in a series of fixed and operable windows to enhance your décor – and your view.

Horizontal Slider Windows

Offering a large, unobstructed view, our sliders operate with finger-tip ease. Sashes of our single and double sliders and three-lite end vent sliders lift out for cleaning.

Single- & Double-Hung Windows

Single- and double-hung tilt windows deliver traditional beauty with improved security, lower maintenance and increased energy efficiency. Featuring cam locks and recessed finger latches, the sashes slide and tilt in for easy, safe cleaning.

Bow Windows

Almost any opening can become an instant greenhouse or relaxing nook with a striking bow window. Comprised of any combination of four to five individual windows, both insulated and non-insulated head and seat options are available.

Bay Windows

Few styles outshine the bay for beautifying a home's exterior and flooding natural light into interior spaces. Projecting outward from a wall at 30 or 45 degree angles to create a cozy alcove, any combination of windows can be used to create a beautiful bay window. Head and seat options can be insulated or non-insulated.

Custom Shape Windows

Make your house not only a home but a work of art by adding custom shape picture or single-hung windows. Designed just for you to enhance the style and architectural detailing of your home, custom shapes add a unique artistic element to your living space.

Hardware

Hardware and locks used in North-Air's windows are easy to use, secure and come with a lifetime warranty. Fold-down handles come standard on our casement and awning windows. These lie flatter than traditional handles and allow window treatments to close neatly.

Fold-Down Handles

*Self-locking hardware is available on vertical and horizontal sliders only.

For more information please visit our website, www.northairwindow.com

Glass

To increase the efficiency of our windows and doors, North-Air uses energy-saving Low-E glass that features a near-invisible coating that reduces the amount of heat lost while letting in light. And the Super Spacer® technology in every window we make resists condensation, boosts R-values and reduces noise.

- Glass options include
- Bronze- and gray-tint glass
 - Obscure glass
 - Tempered glass
 - Triple glazing

Accessories

North-Air offers a range of accessory options, including wood or vinyl jamb extensions that make a seamless transition from the window frame to your interior finish. Exterior accessories include brickmould with built in sliding J-channel and nail fins for ease of installation and a weather-tight seal to the outdoors. For a refined architectural look, add our 3.5" brickmould. A 2" x 1/2" extrusion is also available that can be used as either a sill extension or a brickmould for a more contemporary look.

* One of the characteristics of Low-E glass is a blue haze that may be seen under certain lighting conditions. This haze is actually light scattered by the coating and is completely normal.
